Campus Event Companion â Requirements Pack (Sample)

Problem: discover campus events + manage RSVPs.
Personas: Student, Organizer.

MVP Requirements:
1) Auth: signup/login; roles student/organizer.
2) Events: organizers create/edit/cancel; students browse/filter/search.
3) RSVP: RSVP/un-RSVP; enforce capacity if configured.
4) Notifications: reminder 24h before; notify on cancellation.

Out of scope: payments, comments/likes, mobile app, recommendations.

Non-functional: JWT authz, input validation, friendly errors.
Edge cases: capacity race, unauthorized edits, invalid date ranges.

Success metrics: RSVP flow <2 minutes; better organizer engagement.
